PHP Developer

Description

The Audit Analytics development team is growing! If you are enthusiastic about the web and driven to solve complex problems creatively, we want to talk to you!

We are looking for an experienced full-stack PHP Developer to join our team. As a PHP developer, you will contribute to the planning and delivery of software platforms used across multiple products and organizational departments. In this role, you will gain essential SQL experience, exposure to large datasets, and implementations of applications drawing from many data sources. You will be responsible for building full stack web applications for our internal and external clients using PHP and MySQL.

Required Qualifications

- Experience crafting and working with relational databases, MySQL preferred
- 2+ years of experience using PHP or equivalent language (Perl, Python, Go, Ruby, VB.net, etc.), HTML, CSS and JavaScript in a business environment
- Proficient knowledge of the SDLC and experience collaborating in a team environment
